PROFESSIONAL SUMMARY

AI Full Stack Developer with deep expertise in compliance automation and financial technology. Reduced regulatory reporting effort by 70% across 20+ SEBI rules through platforms for insider trading detection, rule engines, and LLM-powered document processing. Proven track record delivering reconciliation systems with 98% UAT accuracy across 10,000+ transactions, built on FastAPI, PostgreSQL, Docker, and RAG pipelines.

EXPERIENCE

Software Developer April 2025 – Present

Infomatics Services Pvt. Ltd, Mumbai, MH

- Designed and built compliance automation platforms using Python and PostgreSQL, reducing manual regulatory reporting effort by 70% across 20+ SEBI rules.
- Architected 15+ RESTful endpoints and normalized database schemas powering real-time compliance tracking across 20+ SEBI regulatory rules, enabling instant violation detection and full audit trails.
- Designed and implemented a Docker-based CI/CD pipeline on Ubuntu servers, cutting average deployment time from hours to under 10 minutes while maintaining zero-downtime rollouts.
- Integrated OCR and document intelligence tools into enterprise systems, processing documents with an average turnaround time of 2 seconds per page.
- Conducted code reviews for the engineering team and mentored 3 junior developers to ensure code quality and system maintainability.
- Implemented a robust JWT-based authentication system with granular RBAC scope mapping roles from Super Admin to Viewer, alongside data-migration and ingestion pipelines.

PROJECTS

AI Chef June 2026 – Present

- Built a multi-agent meal-planning platform: five specialist agents (Orchestrator, MenuPlanner, PlanValidator, InventoryChecker, Shopper) turn dietary preferences into validated 7-day meal plans using Groq's llama-3.3-70b LLM, with a rule-based PlanValidator auditing every draft and triggering corrective re-plans.
- FastAPI backend with a React + Tailwind glassmorphism UI, PostgreSQL persistence via Docker Compose, automatic pantry restocking after orders, and 30+ automated tests with CI.

Autonomous AI Career Agent June 2026 – Present (Part-time)

- Developed a local-first, AI-powered job search CRM prototype featuring 5 phases: resume tailoring, Kanban tracking, job discovery, interview prep, automated submissions, and network intelligence.
- Engineered the system for complete, fully offline execution and workflow by leveraging Ollama for local AI processing with in-memory storage.

NISM AI - Certificate Processing Microservice June 2026 – July 2026

- Developed a FastAPI microservice for processing NISM certificates, supporting secure decryption of password-protected PDFs and various image formats (JPG, PNG, TIFF).
- Extracted structured certificate data using Azure Document Intelligence and Azure OpenAI, achieving ~2 seconds/page with verified identity checks and on-device face verification using InsightFace.
- Configured multi-destination storage for extracted records, utilizing local storage and MS SQL Server for database persistence.

TrilliumReconAI - Financial Reconciliation Platform March 2026 – April 2026

- Built a full-stack financial reconciliation system using React 18, TypeScript, FastAPI, SQLAlchemy, and MS SQL Server, containerized with Docker Compose.
- Implemented a reconciliation engine matching bank transactions against CMS records ($\pm 0.5\%$ amount, ± 3 days date tolerance) with EXACT/PARTIAL/UNMATCHED classification, achieving 98% UAT match accuracy across 10,000+ transactions.
- Developed a JWT-based authentication system with RBAC (Super Admin to Viewer) and a group-based approval workflow for recall requests.

Fashion AI Gallery January 2026

- Built AI-powered e-commerce platform using React, FastAPI, SQLAlchemy and TypeScript.
- Implemented vector search with Pinecone, sub-second matching, a RAG assistant using Gemini maintaining ~85% RAG satisfaction, and virtual try-on using diffusion models.

Compluse October 2025 – November 2025

- Developed compliance calendar and regulatory deadline tracking system with structured database schema, reducing missed deadlines by 40%.

NovusLite October 2025 – November 2025

- Built a secure insider trading compliance workflow system with backend validation and reporting logic, reducing review cycle time by 50%.

CardPulse May 2025 – June 2025

- Developed OCR-based structured data extraction system using Azure Document Intelligence with PostgreSQL integration, enabling faster ingestion with strong field accuracy.

SKILLS

Languages: Python, TypeScript, SQL, JavaScript

Backend: FastAPI, PostgreSQL, MS SQL Server, SQLAlchemy, Celery, Redis

Frontend: React, Tailwind CSS, HTML5, CSS3, State Management, Responsive Design

AI & Data: Gemini, Pinecone, RAG, Prompt Engineering, Azure OpenAI, Azure Document Intelligence, InsightFace, Ollama, LangGraph, LangChain

DevOps: Docker, Docker Compose, CI/CD, Git/GitHub, Ubuntu Server, Nginx

EDUCATION

Bachelor of Engineering in Information Technology 2020 – 2023

University of Mumbai, Mumbai, MH
