

RISHIKA VISHWAKARMA

PROFESSIONAL SUMMARY

Backend-focused engineer experienced in building AI-powered and compliance automation systems. Strong background in Python development, REST API design, PostgreSQL and vector-based search systems. Hands-on experience collaborating with DevOps teams for Dockerized deployments and CI/CD workflows on Ubuntu servers.

EXPERIENCE

Infomatics Services Pvt. Ltd, Mumbai, MH

April 2025 - PRESENT

Developed compliance automation platforms using Python and PostgreSQL. Designed backend validation engines and structured regulatory reporting workflows.

Build REST APIs and database models for compliance tracking systems.

Collaborated with Docker and DevOps teams for containerized deployment on Ubuntu servers.

Worked with CI/CD pipelines to support automated build and release processes.

Integrated OCR and document intelligence tools into enterprise systems.

EDUCATION

University of Mumbai, Mumbai, MH — [B.Sc. Information Technology](#)

June 2022 - May 2023

PROJECTS

Fashion AI Gallery

Built AI-powered e-commerce platform using React, FastAPI, SQLAlchemy and TypeScript.

Implemented vector search with Pinecone, RAG assistant using Gemini and virtual try-on using diffusion models.

Compluse

Developed compliance calendar and regulatory deadline tracking system with structured database schema.

NovusLite

Built a secure insider trading compliance workflow system with backend validation and reporting logic.

CardPulse

Developed OCR-based structured data extraction system using Azure Document intelligence with PostgreSQL integration.
